

Désinstallation ONYX Server sur Linux

Introduction

Pour désinstaller Onyx Server. Tout d'abord, arrêter tous les processus Onyx Server. Répéter les premières étapes de la procédure d'installation pour télécharger et décompresser le package d'installation.

Procédure

Dans le dossier «mapping_install» créé, exécuter le script d'installation (en tant que profil root):

```
cd mapping_install
./mapinst.sh
```

le script affiche toutes les étapes de la désinstallation, comme indiqué ci-dessous. :

```
Control user permissions
Checking installation files folder
Do you want to update mappingenv binary?
yes | no&nbsp;?
<strong>yes</strong>
```

Remarque: Le binaire mappingenv est le gestionnaire d'environnement de Onyx Server. Il est fortement recommandé de le mettre à jour afin de supprimer correctement l'environnement.

```
Enter installation path of mappingenv binary
default: /bin
[<strong>Enter</strong>]
Do you confirm this path: /bin
yes | no&nbsp;?
<strong>yes</strong>
Detecting existing version
1&nbsp;:: MAPPING_DEV /apps/mappingdev/conf/mapping.conf      8002      Active
2&nbsp;:: MAPPING_PROD /apps/mapping/conf/mapping.conf        8003      Active
Do you want to use one of the above versions?
yes | no&nbsp;?
<strong>yes</strong>
Enter the name of the version you want to use or ":q" to exit
MAPPING_DEV
Do you want to:
1&nbsp;:: install a new version?
2&nbsp;:: update current version?
```

3 : uninstall current version?
4 : exit?
> 1 | 2 | 3 | 4 ?
3
Do you confirm the removal of this environment?
yes | no ?
yes
Removing current version...
